| <https://www.linkedin.com/in/suleiman-bello-5946292b4/> |

Software Engineering student at Nottingham Trent University with a genuine obsession for design that works, prototyping user-centred interfaces and translating ideas into experiences that feel effortless. I approach every problem with a user-first mindset, backed by hands-on skills in Figma, HTML, and CSS and a drive to iterate until it's right. Resilient, detail-obsessed, and relentless about growth.

SKILLS:

UI/UX Design: Figma, Wireframing, Prototyping, User-Centred Design, Hand-drawn Ideation

Creative Direction: Brand Identity Design, Visual Direction, Photography Editing, Video Editing

Frontend Development: HTML, CSS, JavaScript, Tailwind CSS, Responsive Design

Tools & Workflow: Git, GitHub, VSCode, Chrome DevTools, Agile

Currently Learning: Framer Motion, React.js, TypeScript

Uniquely positioned at the intersection of software engineering, creative direction, and UX design

EXPERIENCE:

Creative Director — GRTCTRL Fashion Brand (1 Year, Present)

- Produced 200+ assets spanning graphic design, video, marketing, and photography editing from concept to delivery
- Directed the brand's complete website end-to-end as the sole head of design
- Maintained a consistent visual language across all brand touchpoints through typography, colour, and aesthetic direction

Freelance Logo Designer — Independent (Ongoing)

- Designed brand identities and logo systems for **3 companies**, delivering all projects within a **4-week turnaround** from initial brief to final production-ready files
- Managed client relationships independently, interpreting briefs and delivering polished identity work across varied industries.
- Applied real-world design practice across varied industries, building a versatile portfolio of commercial identity work

Vice President — Self Improvement Society, NTU (6 Months, Present)

- Co-founded a university society from the ground up, establishing its structure, operations, and strategic direction with zero prior infrastructure
- Grew membership to **50 members**, through getting community engagement and demonstrating the ability to build and scale an organisation from nothing

Course Representative — Nottingham Trent University (Present)

- Elected by peers as the official representative for the Software Engineering cohort, acting as the primary liaison between students and faculty
 - Developed strong communication, advocacy, and professional stakeholder management skills through regular structured engagement with academic staff
-

PROJECT EXPERIENCE :

Fast Lane Consultancy Services – Web Application & CRM

(NTU Client Project, In Progress) Team Lead & Head of UI/UX Design | Team of 7

- Leading a cross-functional team of 7 to design and deliver a full-scale web application and CRM portal for a real UK consultancy business
- Serving as UI/UX lead — defining information architecture, user flows, and visual design direction across a multi-page marketing website and secure client dashboard
- Coordinated rapid prototyping to present early design concepts directly to the client, gathering real feedback to iterate and refine the product
- Ensuring full design consistency, mobile responsiveness, and alignment with the client's brand identity throughout the entire project lifecycle

Events, Advertisement & Review Website - HTML, CSS, JavaScript (*First Class*):

- Designed and developed a fully responsive multi-page events platform from scratch, achieving a First Class grade
- Led the end-to-end design process from initial layout structure through to interactive UI components
- Applied strong visual hierarchy, intuitive navigation, and consistent design language across all pages
- Prioritised user experience and clean visual presentation throughout every stage of development

BMI Health Calculator — C++

- Built a user-facing health tool that collects input, calculates BMI, and delivers categorised personalised health feedback
- Prioritised clarity of output and a guided user experience despite a console-based environment
- Demonstrated user-centred thinking by ensuring all results were accurate, readable, and actionable
- Strengthened understanding of how information design principles apply beyond traditional visual interfaces

EDUCATION

Nottingham Trent University

Nottingham, UK

BSc (Hons) Software Engineering

2023 - Present | First Year Grade: Upper Second Class

Related Course Modules

- **Software Design & Implementation** — core design principles, software architecture and implementation strategies
- **Internet Application Programming** — client-side and server-side web development foundations
- **Practical Project Management & Professional Development** — Agile workflows and collaborative team practices
- **Information & Database Engineering** — data management, structure and information architecture
- **Software Engineering** — full software development lifecycle and engineering best practices
- **Systems Software** — low-level systems concepts and technical problem solving.

MEMBERSHIPS & AFFILIATIONS

BCS — The Chartered Institute for IT (*Student Member, Present*)
